

## Memorandum - Micro #236

To: UNC Medical Center Attending Physicians, Associated Clinics,  
Housestaff, Clinical Nurse Coordinators, Department Heads and  
Supervisors

From:  Melissa Miller, PhD, Director  
UNCMC Microbiology and Molecular Microbiology Laboratories

 Herbert C. Whinna, MD, PhD  
Medical Director, McLendon Clinical Laboratories and  
Hillsborough Hospital Laboratories

Date: June 10, 2024

**Subject: Changes to HIV Genotyping Test Orders**

---

Effective June 10, 2024, the available reference lab tests for HIV genotyping will change at UNC Medical Center.

The individual tests below will be discontinued:

- ❖ LabCorp HIV GenoSure MG (NRTIs, NNRTIs, PIs) [LAB11084]
- ❖ LabCorp Genosure Integrase (INIs) [LAB5638]

And replaced with a new orderable test:

- ❖ LabCorp GenoSure Prime (NRTIs, NNRTIs, PIs, INIs) [LAB115817]

This change will allow a comprehensive resistance profile to be obtained with a single order. There is no change to turnaround time (2-3 weeks), collection methods (3 EDTA or PPT tubes), or the HIV viral load requirement (500 copies/mL).

McLendon Labs Referral Testing Services is unable to process orders from other UNC System Hospitals for this test. HIV Genotyping via Mayo [LAB11084] will remain available for UNC System Hospitals.

Additional information about the LabCorp GenoSure Prime test can be found on the [McLendon Clinical Laboratories](#) and [LabCorp](#) websites. Questions can be directed to McLendon Labs Referral Testing at 984-974-1414 or Dr. Melissa Miller at [Melissa.Miller@unchealth.unc.edu](mailto:Melissa.Miller@unchealth.unc.edu).
