

Memorandum – Core #210

To: UNCCMC Physicians, Eastowne MOB, Housestaff, Clinical Nurse Coordinators, Department Heads and Supervisors

From:  Herbert C Whinna, MD, PhD; Medical Director
UNCCMC, McLendon Clinical Laboratories

 Steven W. Cotten, PhD; Director of Automated Chemistry
UNC Medical Center

Date: June 10, 2024

Subject: Standardized Glucose Tolerance Testing in EPIC

Effective with the bi-annual EPIC upgrade on 6/8/2024, standardized glucose tolerance test orders become available in EPIC.

LAB17006, NON-PREGNANT GTT (0,2 HR)
LAB5364, GESTATIONAL GTT SCREEN (1HR)
LAB17001, GESTATIONAL GTT CONFIRMATION (0-3HR)

The additional specimen collections for LAB17001 and LAB17006 automatically become available for collection after the fasting specimen collection has been documented in Epic. Only a single order needs to be placed for serial collections and the correct reference ranges for each time point specific to the glucoala amount are appended in accordance with clinical practice guidelines.

The EPIC @ UNC Tipsheet regarding these orders is available here [Glucose Tolerance Testing.pdf](#)
